## PREFACE

This edition of the Statistics Canada Catalogue of Publications updates the titles released as of June 30, 1976 and incorporates the listings contained in the 1975 issue and its supplement. It is intended that this edition, and its supplements, will remain in use until 1978.

All publications from both the 1971 Census of Population and Housing and the Census of Merchandising and Services are included, although in certain instances the publications will be issued after June 30, 1976.

Among the new features of the 1976-77 Catalogue are a special listing of publications containing urban data, and the International Standard Serial Numbers (ISSN) assigned to Statistics Canada publications by the National Library. Also listed for the first time are the public libraries which make all of Statistics Canada's publications available for reference.

Part II of the Catalogue, which provides information about unpublished information, has been enlarged, as has the section dealing with selected statistical publications of other Federal Government departments and agencies.

Users should note that the 1975 edition discontinued listing all "vintage" publications, many of which were out-of-print. It is therefore suggested that those wishing to refer to such publications should use the 1973-74 issue, since it provides a link between the Historical Catalogue (11-504) and the current edition. Together, these provide a record of Statistics Canada publications since the Bureau was formed in 1918.

It is expected the 1976 Census publications will be listed in a separate Catalogue.

## INTRODUCTION

Statistics Canada responsibilities in the Canadian statistical system concern the whole range of statistics on the economic and social activities and conditions of the Canadian people.

The bureau's publishing program reflects this responsibility, and is designed to make statistical information readily available to users in the form in which it is most frequently wanted, including publications, computer tapes, and microform. Data are also available on-line through the CANSIM system.

It is obviously not practicable to publish compilations which will serve every purpose or need. Therefore, users should keep in mind that a considerable volume of unpublished information is available from Statistics Canada on request, on a cost-recovery basis.

This Catalogue is presented in two main sections: Part I provides annotations on publications bearing catalogue numbers, while Part II provides information on unpublished or uncatalogued materials referred to above.

All information compiled by Statistics Canada is subject to the clauses of the Statistics Act which protect organizations and persons from individual disclosure.

## How to Use The Catalogue

For many users of Statistics Canada information, the Table of Contents beginning on page 5 will lead to the statistics wanted. For others, however, the Title, Subject, and Commodity Index beginning on page 217 will be helpful. It contains several thousand entries arranged in alphabetical order and is cross-referenced to show the several publications (if such is the case) in which information on a given subject may be found.

Under the Statistics Canada system of cataloguing, each publication is assigned a fivedigit catalogue number which is printed in large type in the upper left-hand corner of the front cover. These catalogue numbers are a permanent means of identification, additional to the title.

This use of catalogue numbers on Statistics Canada publications is in line with suggestions made by various large users of bureau publications; for these and others, it should facilitate and simplify both the ordering and filing of bureau publications.

#### Formation of Five-digit Catalogue Numbers

First Digit: Under the grouping arrangement, all Statistics Canada publications are classified into 9 major subject groups, as follows: (1) General; (2) Primary Industries; (3) Manufacturing; (4) Manufacturing (concluded); (5) Transportation, Communications and Utilities; (6) Commerce, Construction, Finance and Prices; (7) Employment, Unemployment and Labour Income; (8) Education, Health and Welfare; and (9) Census, Population Estimates, Citizenship and Immigration. Thus, the first digit in the catalogue number ranges from 1 to 9.

Second Digit: Each of the above 9 major groups is further divided into 1 to 9 subgroups as required. An example: Major Group 3 (Manufacturing) is divided into six sub-groups – (1) General Survey; (2) Foods, Beverages and Tobacco; (3) Leather and Rubber Products; (4) Textiles and Apparel; (5) Wood Products; (6) Paper Products and Printing. Numbers 7, 8 and 9 have not been allotted and will provide for possible future sub-groups.

Third Digit: The third digit indicates frequency of publication as follows: "0" and "1", issued more than once a year; "2" and "3", annuals; "4" biennials; "5", occasional publications; and "6" annual/various — annuals with variable sub-titles.

Fourth and Fifth Digits: The fourth and fifth digits are used to give each title its own permanent number. The numbers are allotted in chronological sequence as new titles are published.

Example Catalogue Number: The following is a typical example of the application of the above catalogue numbering system: Catalogue number 31–001 has been assigned to the Statistics Canada report entitled *Inventories*, *Shipments and Orders in Manufacturing Industries* –

- 3 Manufacturing (Major Grouping)
- 1 General Survey (Minor Grouping)
- 0 Periodical (in this case, monthly)
- 01 First title in this particular grouping.

The main features of this grouping arrangement, including code numbers of main subject groups and specific sub-groups are shown in the Table of Contents on page 5. These grouping do not coincide with the bureau's Divisional organization and Division titles are of no assistance in ordering or cataloguing Statistics Canada publications.

International Standard Serial Numbers (ISSN). — The National Library of Canada is assigning 8-digit International Standard Serial Numbers (ISSN) to Statistics Canada serial publications (periodicals and annuals). The purpose of this numbering system is to facilitate identification, citation, ordering, check-in and automated control of serials among countries. Numbers assigned by the National Library to June 30, 1976 have been included in the appropriate annotations in Part I of the Catalogue. An example: 21–003 *Quarterly Bulletin of Agricultural Statistics*. Bil. Approx. 282 pp. (ISSN 0033–5320).

#### Local Access to Data

Statistics Canada has a Central Inquiries Service which operates as a focal point to deal with inquiries from the general public. This group of specialists is thoroughly conversant with the variety of information available throughout the bureau and is also knowledgeable about other sources of information in the federal and provincial governments as well as private organizations. The group can be reached by writing to Statistics Canada, Ottawa K1A 0T6, or by telephoning (613) 992-4734 or 992-2959. The latter telephone is equipped to record requests on a 24 hour a day basis.

Also, Regional Advisors are located in Statistics Canada Regional Offices across Canada. These officers have backgrounds in business and government, and will suggest ways to solve problems using Statistics Canada data. Addresses and toll-free telephone numbers of these officers and their support staffs are listed on page 12.

Statistics Canada publications are also available for reference in libraries, including the National Library, federal and provincial legislative libraries, and major public and university libraries. The Statistics Canada Library holds the historical collection of all bureau publications and provides a reference service to the statistical information included in them. Libraries making publicly available all publications are listed on page 13.

## **Ordering Publications**

The descriptive notes provided with each title or group of tiles listed are intended to serve only as a guide to their contents. They should be sufficient, in most cases, to help in the selection of publications for any specific purpose. If in doubt, contact any of the Statistics Canada Regional Advisors listed on page 12.

How to Order. – When ordering, catalogue numbers, titles and issues (month, year), of publications should be quoted.

Subscriptions or standing orders are accepted for all periodical and annual publications, but not for biennial and occasional publications. Subscriptions should be forwarded to Publications Distribution, Statistics Canada, Ottawa K1A 0T6, and order forms will be found at the end of the Catalogue. Individual publications may be ordered from either Publications Distribution, or the regional offices listed on page 12 may be of assistance.

Those interested can order the Full Publication Service and receive all Statistics Canada publications automatically as soon as they are released. The current cost is \$840 per year for the service to locations in Canada and \$1,008 for the service to locations elsewhere. An additional charge is levied if Air Mail dispatch is required.

The Full Publication Service does not include decennial or quinquennial Census publications which are priced at \$300 (\$360 outside Canada) for the 1971 series on population, agriculture, households and families, and the labour force. The cost in Canada for the 1971 Census series on Merchandising and Services is \$24.75, and \$29.70 to other countries.

How to Make Payment. — Regulations require that remittance be made prior to the servicing of subscriptions or the mailing of single issues. Purchasers will avoid delay by including remittance with their order.

Alternatively, purchasers may use Publishing Centre credit accounts, and receive regular statements. Account application forms are available from the Publishing Centre, Supply and Services Canada, 270 Albert St., Ottawa K1A 0S9, or from the Regional Advisors listed on page 12 of the Catalogue.

Prices listed in this Catalogue apply to Canada, and customers in countries outside Canada should add 20% to cover postage and handling charges. An additional charge is levied if Air Mail is required. Prices of publications are subject to change without notice.

Remittances should be in the form of cheque or money order made payable to the Receiver General for Canada. Postage stamps and currency should not be used in payment for publications.

#### **Publications in Microform**

By arrangement with Micromedia Limited, all publications issued by Statistics Canada and its predecessors from pre-Confederation to date (1841-1975) are being released on microfiche over a five-year period. All microfiche are identified with catalogue numbers used in Statistics Canada Catalogues, including the *Historical Catalogue of Dominion Bureau of Statistics Publications* 1918-1960 (Ottawa, 1967); thus fiche may be filed and retrieved in the same sequence as printed publications. Information on available titles, prices and terms of sale may be obtained by contacting Micromedia Limited, Box 34, Toronto, Ontario M5M 4L6.

75¢

12-534 A Financial Information System for Municipalities. Supplement to Volume II – Pro Forma Statements. E. and F. 32 pp.

Consists of details of financial information required from municipalities for national purposes depicted through the medium of generalized financial statements and supporting schedules.

50¢

12-536 Occupational Classification Manual, Census of Canada 1971. Based on the Canadian Classification and Dictionary of Occupations: Volume I. E. and F. 111 pp.

The first part of a two-part manual for classifying occupations to occupational groups. The classification consists of 22 major groups which are successively broken down into 81 minor groups and 486 unit groups. Volume I contains the definitions of these groups. Volume II has a separate catalogue number (12-537). Although complete in itself, this classification is designed for use in conjunction with the *Standard Industrial Classification* (12-501). \$5

12-537 Occupational Classification Manual, Census of Canada 1971. Based on the Canadian Classification and Dictionary of Occupations: Volume II. 455 pp.

The second part of a two-part manual for classifying occupations to occupational groups. The classification consists of 22 major groups which are successively broken down into 81 minor groups and 486 unit groups. Volume I which contains the definitions of these groups has a separate catalogue number (12–536). Volume II contains a classified and an alphabetic index to which have been assigned some 18,000 occupational titles. Although complete in itself, this classification is designed for use in conjunction with the *Standard Industrial Classification* (12–501). Similar classification manuals were used for past decennial censuses.

12-538 Occupational Classification Manual, Census of Canada 1971. Based on the Canadian Classification and Dictionary of Occupations: Volume II. Bil. 547 pp.

The second part of a two-part manual for classifying occupations to occupational groups. The classification consists of 22 major groups which are successively broken down into 81 minor groups and 486 unit groups. Volume I which contains the definitions of these groups has a separate catalogue number (12–536). Volume II contains a classified and an alphabetic index to which have been assigned some 25,000 occupational titles in both English and French. Although complete in itself, this classification is designed for use in conjunction with the *Standard Industrial Classification* (12–501).

12-540 Dictionary of 1971 Census Terms. Bil. 125 pp.

This dictionary gives information about the content of the 1971 Census. It describes the questions asked, responses recorded on the master file, and indicates, where applicable, the subpopulation for which the data are reported. It includes sampling detail and points out any special problems of interpretation that might arise with a particular question. \$1.50

12-541 Industrial Commodity Classification Manual, Volume I – The Classification, 1973. E. and F. 309 pp.

The Industrial Commodity Classification (ICC) is the application of the Standard Commodity Classification (SCC) – (12–502) – in the field of industrial commodity statistics. The ICC utilizes a decimal coding system which facilitates the automatic processing of industrial commodity data. Since it is derived from the Standard Commodity Classification, it has a direct relationship to the SCC and other working commodity classifications such as the *Trade of Canada* Commodity Classification (12–520E).

12-544 Canadian International Trade Classification, Numeric Index. E. and F. 271 pp.

This numeric index to the Canadian International Trade Classification (CITC) has been developed jointly by the Department of National Revenue, Customs and Excise, and the External Trade Division of Statistics Canada. It lists the 16,000 7-digit commodity code headings of the CITC, together with the 5-digit classes of the Import Commodity Classification from which the CITC was developed. The listing is in numeric sequence, so that importers or their Customs brokers who require information on the commodity code field when completing Customs form B3 may follow the logic of the CITC. An introduction to this reference manual, together with a guide to its use, is also included.

(The CITC is also published in alphabetic form. This listing is more exhaustive than the numeric index and contains some 45,000 commodity descriptions and the corresponding 7-digit commodity codes. This index, which because of its restricted and specialized use, has not been assigned a catalogue number, is available from Government of Canada Bookstores at a cost of \$5.00 per copy).

## Supplements to the Canadian International Trade Classification.

These supplements cover certain homogeneus groups of commodities which figure prominently in Canada's import trade. They are designed to assist importers or their customs brokers to apply the proper commodity codes on imports when completing Customs form "B3". The material is arranged in numeric order. Detailed explanatory notes are included to assist in the resolution of classification problems. An introduction describing each supplement and how to use it is also included. The supplements prepared to date are listed below. They may be obtained by writing to:

Classification Section, External Trade Division, Statistics Canada, Ottawa, K1A 0T6.

## Standard Geographical Classification

The Standard Geographical Classification is a system for the identification and coding of geographical areas. It consists of a set of geographical units, usually municipalities, each identified by a unique code number which reflects municipal boundaries as of December 31, 1973 (January 1, 1974 for Ontario), and a list of place names related to these units. The objective of the system is to make available a standard set of geographical units which, when used throughout Statistics Canada and elsewhere, will facilitate the comparison of statistics for particular areas. The Classification is published in four volumes — Catalogue Numbers 12–545, 12–546, 12–547 and 12–552 — described as follows:

## 12--545 Standard Geographical Classification. Volume I. – The Classification. Bil. 163 pp.

Provides a detailed explanation of the concept and structure of the Standard Geographical Classification, special tables concerning counties, components of Census metropolitan areas and agglomerations and foreign countries, a list of census subdivisions (the geographical units which form the basis of the classification), and a set of reference maps.

\$2.80

12-546 Standard Geographical Classification, Volume II. - The Numerical Index. Bil. 356 pp.

Contains all the names found in the Standard Geographical Classification system listed in numerical order following the structure of the code, i.e., place names are listed within census subdivisions, census subdivisions within census divisions.

\$4.50

12-547 Standard Geographical Classification. Volume III. The Alphabetical Index. Bil. 365 pp.

Contains all the names found in the Standard Geographical Classification system listed in alphabetical order. \$5.25

12-548 Models for Time Series. E. and F. 97 pp.

The main purpose of this study is the identification and analysis of the basic hypotheses of different kinds of models for time series. Emphasis is given to univariate models for which well established methods of estimation already exist. By discussing their assumptions it is hoped to make users and researchers aware of their limitations. Error models, autoregressive models, moving average models and autoregressive integrated moving average models are extensively treated in both the frequency and time domain. Chapter 8 is devoted to the problem of ergodicity and Chapter 10 deals with time series with seasonality.

\$1.40

12-549 Changes to Municipal Boundaries, Status and Names, 1974. Bil. 78 pp.

Description of the changes in municipal boundaries during 1974, census population figures on the current municipal boundaries, area involved in the change, and the Standard geographical classification code, before and after the change. \$1.40

12-552 Standard Geographical Classification. Volume IV. The Alphabetical Index by Province. Bil. 355 pp.

Contains all the names found in the Standard Geographical Classification system listed in alphabetical order within the ten provinces and the two territories. \$4.50

13-210 Income After Tax, Distribution by Size in Canada. Bil. 73 pp. (ISSN 0319-0374).

Income distributions for families, unattached individuals and all persons with income are shown on an after tax basis by selected characteristics, such as place of residence, age, sex, etc. Income after taxes is defined as total money income (see 13-207) less income taxes paid. First issue, 1971; there will be no separate report for 1972; 1972 and 1973 data will be published in one edition. \$1.40

13-211 Fixed Capital Flows and Stocks. Bil. 52 pp. (ISSN 0317-5154).

Contains estimates of fixed non-residential capital stocks and flows by major industries according to the 1960 Standard Industrial Classification both in constant (1961) and current dollar valuation. Specifically, it contains estimates of capital stocks and flows relating to the whole Canadian economy (excluding housing). Estimates are given for construction type capital goods, machinery and equipment and capital items charged to operating expenses. Fixed capital flow data consist of three parts: gross and net fixed capital formation and capital consumption allowance. Both mid-year gross and net stocks are shown.

## 13-534 Income Distributions by Size in Canada, 1967. E. and F. Approx. 83 pp.

Estimates of family and individual incomes by size of income and by major source, region, age, sex and other characteristics. Data are comparable to the 1965 publication (13–528) and pertain to all individuals and families living in private households. The appendix contains a few non-farm income distributions that are comparable to previous reports and the data published in the historical summary covering selected years 1951-1965 (13–529).

## 13-535 Earnings and Work Experience of the 1967 Labour Force. 46 pp.

Earnings of male and female earners by size of earnings in 1967 and various personal characteristics. Distribution of families and unattached individuals by size of income and the work experience of the family head in 1967. Some comparisons with similar 1961 data. The data were obtained from the Survey of Consumer Finances taken in the spring of 1968.

## 13-536 Statistics on Low Income in Canada, 1967. 49 pp.

Low income cut-offs established for the analysis of the 1961 Census data were updated by the rise in the Consumer Price Index and all families and unattached individuals were categorized as having had incomes above or below these income cut-offs in 1967. Tables show distributions of low income families and individuals by characteristics such as work experience of family head, place of residence and other socio-demographic characteristics and contrast these with distributions of families and unattached individuals above the income cut-offs. Incidence of low income is estimated for many types of families and individuals, often showing in addition average family income, average family size, average number of children, etc. The data were obtained from the Survey of Consumer Finances taken in the spring of 1968.

#### 13-537 Econometric Study of Incomes of Canadian Families, 1967. 50 pp.

Cross-sectional data from the Survey of Consumer Finances taken in spring 1968 were used in multiple regressions in order to rank and quantify the influence of socio-economic characteristics on the level of family income in 1967. The study examines the effects of variables such as age, sex, education and occupation of the family head, the labour force participation of the wife and the place of residence of the family (rural or urban with some subdivision for city size) on family income in the five regions and in Canada.  $75\phi$ 

### 13-538 Family Incomes (Census Families), 1967. 21 pp.

Estimates of incomes of families and persons not in families by size of income and by major source, region, sex, age and other characteristics. The concept of family used in this report is identical to that employed in Canadian censuses. The data pertain to all census families and persons not in families in private households.  $50\phi$ 

## 13-539 Comparative Income Distributions, 1965 and 1967. 58 pp.

Section I includes estimates for the two years of individual income recipients, and families and unattached individuals by income size group measured in constant (1961) dollars. Tables show distributions by age, sex, family size, region, etc. Section II of report consists of tables describing the composition of income quintiles in the two years. This report updates estimates published in Catalogue 13–529 except that the data coverage is no longer restricted to non-farm families and individuals.

#### 13-540 Household Facilities by Income and Other Characteristics, 1968. 180 pp.

Presents data on the interrelationships of household incomes and household facilities and equipment. This report is based on the data from the 1968 Surveys of Consumer Finances and of Household Facilities and Equipment. It contains distributions of households by and within household income size groups, by region, by household type and other characteristics. \$2

## 13-541 Socio-economic Characteristics of the Population Age 14 to 24, 1967. 67 pp.

From the data collected in the spring of 1968 in the Survey of Consumer Finances special statistical tables on the incomes and work experience of young people (aged 14 to 24) in 1967 were compiled. Special attention is paid to the family circumstances of the young people. Some regressions to explain the labour force participation of wives in young families and of young family members (usually living in parental homes) are also presented. \$1

#### 13-542 Income Distributions by Size in Canada, 1969 Preliminary Estimates. 21 pp.

Estimates of family and individual incomes by size of income, region, family size, number of children, age and sex (of family head or individual). ## 3: MANUFACTURING

# **Description of Reports**

Publications listed under "Manufacturing" relate to Division 5 of the Standard Industrial Classification.

These publications consist of a large number of reports, some of which provide summarized and analytical information for manufacturing as a whole and others which provide detailed information on individual manufacturing industries or on various commodities.

Although titles of the various reports are broadly indicative of the subject matter covered, explanatory notes have been included under title headings where necessary. Such notes are generally restricted to reports dealing with the manufacturing industries as a whole (sub-group 31) and to those publications dealing with commodities. The reports on individual industries are generally similar to each other in character and include such principal statistics as: number of establishments, number and type of employees and their salaries and wages, cost of fuel and electricity, value of shipments of goods of own manufacture, and value added. Comparative statistics are given for Canada for earlier years and for the preceding year for provinces. Also shown are the value and, where applicable, quantities of major products shipped and purchased materials used by establishments classified to the industry. Some reports also show total manufacturers' shipments of relevant commodities without regard to industry of origin, but this is given comprehensively for all commodities in

an annual report on products shipped by Canadian manufacturers.

Primarily due to the fact that annual surveys cannot be initiated until the end of the calendar year and to the time required to collect, edit and compile extensive data, most annual industry reports are not available until a year or more after the end of the year of survey. However, two-page preliminary bulletins providing data on shipments of goods of own manufacture and on principal statistics by province are issued to subscribers as soon as the statistics on individual industries are compiled, expediting their availability to users considerably. Other preliminary bulletins are also published relating to manufacturing as a whole.

In addition there are a large number of publications which are published more frequently than once a year and which contain current information on commodities (generally shipments, production or consumption). Although not exactly suitable to industry analyses, except in the case of one-industry commodities, they have proven to be most useful in commodity analyses.

Current estimates of the value of shipments, inventories and orders for manufacturing industries in total, numerous sub-aggregations and selected industries are issued monthly. They are based on a sample survey of establishments representing about 75% of the shipments, determined from the Census of Manufactures.

# 31: General Survey

### Preliminary Bulletins, Census of Manufactures

A preliminary bulletin for almost every report of the annual Census of Manufactures, including some 130 industry reports and most general reports, is sent free-of-charge to subscribers to the report involved. In addition, the entire set of preliminary bulletins may be subscribed to as a service for \$4.90 per annual Census. Preliminary bulletins contain selected commodity and principal statistics (employees, shipments, etc.) in the case of industry reports and selected principal statistics in the case of general reports.

#### Periodicals

31-001 Inventories, Shipments and Orders in Manufacturing Industries. Monthly. Bil. Approx. 47 pp.

Values of shipments, new and unfilled orders and month-end inventories by months in all manufacturing industries, in selected individual industries, and in groupings, according to the Standard Industrial Classification and by economic-use; ratios of value of inventories to shipments; concepts and sources.

55 $\phi$  a copy, \$5.50 a year

31-002 New Manufacturing Establishments in Canada.

Names, addresses and principal products of new manufacturing plants. Discontinued. Last issue, Dec. 1973.

#### Annual

31-201 General Review of the Manufacturing Industries of Canada, Volume II: Supplementary Data and Analyses.

In a restructuring of the General Review of the Manufacturing Industries of Canada this report was divided into two volumes. See 31-203 for Volume I. The first number of Volume II is to be issued for the 1969 Census of Manufactures. Discontinued. Last issue, 1969. See 31-203.

31-203 General Review of the Manufacturing Industries of Canada; National and Provincial Areas. Formerly General Review of the Manufacturing Industries of Canada, Volume I: Industries by Province. Bil. 215 pp.

Principal statistics for Canada and provinces by industries and industry groups. Historical and other tabulations. \$2.80

31-204 Manufacturing Industries of Canada: Atlantic Provinces.

Provincial and regional data. Discontinued. Last issue, 1971. See 31–203.

31-205 Manufacturing Industries of Canada: Quebec. (ISSN 0527 - 5598.)

Provincial data. Discontinued. Last issue, 1971. See 31-203.

31-206 Manufacturing Industries of Canada: Ontario.

Provincial data. Discontinued. Last issue, 1971. See 31-203.

31-207 Manufacturing Industries of Canada: Prairie Provinces.

Provincial and regional data. Discontinued. Last issue, 1971. See 31–203.

31-208 Manufacturing Industries of Canada: British Columbia, Yukon and Northwest Territories.

Provincial and regional data. Discontinued. Last issue, 1971. See 31–203.

31-209 Manufacturing Industries of Canada, Sub-provincial Areas. Formerly Manufacturing Industries of Canada: Geographical Distribution. Bil. Approx. 444 pp.

Detailed small area data. Total, industry group and industry data for economic regions, census metropolitan areas, industry group data for municipalities; size distributions of establishments for census metropolitan areas and selected municipalities; other tabulations and analyses. \$7.50

31-210 Manufacturing Industries of Canada: Type of Organization and Size of Establishment. Bil. 86 pp.

Principal statistics of manufacturing establishments distributed by type of organization (individual ownership, partnerships, incorporated companies and co-operatives) and by size of establishments according to number employed and to value of shipments of goods of own manufacture. All-industry data for Canada and provinces, other distributions by industry groups for Canada and employment size distributions for individual industries. \$1.40

31-211 Products Shipped by Canadian Manufacturers. Bil. 158 pp.

Total Canadian and provincial shipments of products according to the Industrial Commodity Classification. Value and, where available, quantities of shipments. \$2.80

31-212 Consumption of Containers and Other Packaging Supplies by the Manufacturing Industries. Bil. 28 pp. (ISSN 0576-0186).

Contains consumption data of the manufacturing industries on containers by industry, together with a detailed breakdown of such consumption. See also 31-502.

#### **Biennial**

31-401 Domestic and Foreign Control of Manufacturing Establishments in Canada. Bil. 276 pp.

Establishment-based data distributed according to control in Canada, the United States and other foreign countries, using returns of the Census of Manufactures and the annual Survey of Capital Expenditures. Census of Manufactures data at various levels of disaggregation, including industry groups and individual industries for Canada, industry groups and leading industries for provinces with certain details also for Census Metropolitan areas. Capital expenditures data for industry groups for Canada. \$3.50

# 31-402 Industrial Organization and Concentration in Manufacturing, Mining and Logging Industries. Bil. 136 pp. (ISSN 0318 - 8795).

Measures of industrial concentration for individual industries for 1970 with revised concentration ratios for 1968 and historical comparisons for 1965. The basic measures are shares of industry shipments accounted for by establishments belonging to the largest 4, 8, 12, 20 and 50 enterprises and Herfindahl indexes. Also special compilations for enterprises classified in their entirety to their principal industry (including measures of industry specialization of enterprises classified to an industry). First biennial issue, 1970. See also 31-514. \$2.10

#### Occasional

## 31-504 Destination of Shipments of Manufacturers, 1967. Bil. 276 pp.

Dollar value of the destination of total manufacturers' shipments of goods of own manufacture by industry group and industry, by province of destination; and of the destination of total manufacturers' shipments of goods of own manufacture by industry and by province of origin. \$2.50

### 31-509 Industrial Migration in Ontario. 154 pp.

Examines the application of Markov chain models to the forecasting of two aspects of industrial activity: the relocations of manufacturing establishments, and their growth as measured by number of employees. The modelling is based on data derived from the annual Census of Manufactures spanning the period 1961-65. The study also explores techniques of improving the accuracy of Markov chain models for projective purposes. A basic exposition of the theory is given, and the statistical tests to verify the assumptions of order and stationarity are explained.

# 31-514 Industrial Organization and Concentration in the Manufacturing, Mining and Logging Industries, 1968. Bil. 184 pp.

Measures of industrial concentration for individual industries for 1968 and 1965 (including shares of industry shipments accounted for by establishments belonging to largest 4, 8, 12, 20 and 50 enterprises and Herfindahl indexes). Also special compilations for enterprises classified in their entirety to their principal industry (including measures of industry specialization of enterprises classified to an industry). \$2

# 31-518 Growth Patterns in Manufacturing Employment by Counties and Census Divisions, 1961-1970. Bil. 134 pp.

Uses the industry mix-regional share technique for analysing changes in manufacturing employment. Change in employment for each industry in a census division is compared with the national growth rate for all industries, and this difference is resolved into two components: that attributable to the particular industry's growth rate (industry mix) and the residual change (regional share). Includes an explanation of concepts and methods used. \$1.50

31-519 Inventories, Shipments and Orders in Manufacturing Industries, Historical Supplement, 1970-1973. Bil. 66 pp.

Contains estimated monthly values of shipments by industry group and province, and estimated monthly values of shipments, orders and inventories in selected individual industries, 1970-1973. Benchmarked to the 1971 census of manufactures; comparable with current data published in 31-001. See 31-520 for monthly estimates from 1972 to 1974. Free to subscribers to 31-001.

31-520 Inventories, Shipments and Orders in Manufacturing Industries, Historical Supplement, 1972-1974. Bil. 51 pp.

Contains estimated monthly values of shipments by industry group and province, and estimated monthly values of shipments, orders and inventories in selected individual industries, 1972-1974. Benchmarked to the 1972 Census of Manufactures; comparable with current data published in 31-001. Supersedes estimates in 31-519 for the years 1972 and 1973. Free to subscribers to 31-001.

#### Census Tract Series

Reports in the Census Tract Series present basic population, housing, household, family and labour force characteristics for statistical areas (i.e., census tracts) within each of 29 larger urban centres and census metropolitan areas. Two reports are being issued for each tracted centre – one providing distributions of 100 p.c. data ("A" series) and the other containing classifications of sample data ("B" series). Each report contains an index map outlining the locations of the census tracts for that particular area.

#### "A" Series

Census tract reports in the "A" series present basic distributions by age, sex, marital status, and mother tongue as well as family and household size and composition, and housing attributes of tenure, type of dwellings, number of rooms, and sanitary facilities.

#### PART II

#### UNPUBLISHED INFORMATION

Part II of this Catalogue consists of two main elements, data files and information apart from data files which is generally described as unpublished information. This latter is information which may be useful to a limited number of individuals or organizations, but which is not published because the interest in it is not considered to be sufficiently broad.

Data files include summary tapes, punch card decks and micro data files. These latter are files of individual survey records which have been stripped of any information tending to identify the individual, family, household, etc., to which the record relates.

Unpublished information includes special tabulations, copies of special statements, computer print-outs, and so on. Some unpublished non-statistical information, technical papers and maps such as census maps are also available.

Like all information issued by Statistics Canada, however, data files and unpublished information are subject to the limitations of the Statistics Act which prevents the disclosure of information tending to identify individual persons or companies.

In instances where a request for unpublished information or a data file can be met without a considerable amount of time and effort, there is no charge. In some cases where the work to be done is substantial, a charge may be made. In still other cases a standard charge is made. Where charges are not specified in this Catalogue an estimate of cost will be provided before the work is undertaken.

Some of the classifications in use in the bureau can be made available in machine-readable form. Those interested in acquiring such material should apply in the first instance, to the Standards Division, Statistics Canada, Ottawa K1A 0T6. Otherwise, your dealings would be with the subject area division which produces the information you are interested in or with the Regional Advisor in your region listed on page 12 of this Catalogue.

#### CANSIM®

CANSIM (Canadian Socio-Economic Information Management System) is the Statistics Canada computerized data bank and its supporting software.

Interactive System Users' Manual. E. and F. This manual contains the information necessary to use the Interactive System.

Summary Reference Index. E. and F. This index is a summary of the data in CANSIM. It provides a key to the Series Directory and is the first step in locating and obtaining time series from the system. Free on request.

Main Base Series Directory E. and F. This Directory is a detailed guide to the data on the CANSIM Main Base. For each series it gives the series title, the start date, source of the data, and other descriptive material.

Amendments are made periodically to the Directory as more series are added to the base. These are included in the price of the Directory. The Directory is published in three volumes. \$30.00

Mini Base Series Directory. E. and F. The CANSIM Mini Base, which is available at various secondary distributors,

<sup>&</sup>lt;sup>®</sup>Registered Trade Mark of Statistics Canada

contains a subset of the data in the CANSIM Main Base. The Mini Base Series Directory is a detailed guide to the data on the CANSIM Mini Base. For each series it gives the series title, the start date, source of the data, and other descriptive material.

Amendments are included in the price of the Directory. \$10.00

For further information on availability and cost of the series from CANSIM or to obtain the CANSIM Summary Reference Index, CANSIM Main Base Series Directory, CANSIM Mini Base Series Directory, or the CANSIM Interactive System Users' Manual, telephone (613) 995-7406 or write CANSIM, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0Z8.

#### DATABANK 73 and MASSAGER 73

These two programs and the related documentation are the responsibility of Statistics Canada. The programs may be purchased for \$52 each and manuals for \$6 each. Submit orders to:

Computel Systems Limited, 1200 St. Laurent Boulevard, Ottawa, Ontario. K1K 3B8

#### Capital and Repair Expenditures

Annual capital and repair expenditures for the sub-industries of the major S.I.C. groups of manufacturing in the years 1960 to 1975 are available from the Capital Expenditures Section, Construction Division, Statistics Canada, Ottawa K1A 0T6.

#### Census

For the 1971 Census a central service area was established to assist users to obtain census data. In addition to the published reports listed in this catalogue, there are numerous other special prod-

ucts or services available, and a variety of forms in which statistics can be supplied. General descriptive information, consultation and technical documentation related to the conduct of the census and on the processing of the data, preplanned and special products, prices and availability can be obtained by writing or telephoning to:

Census User Inquiry Service, Statistics Canada, Ottawa K1A 0T7 Telephone (613) 996-5254

When making a request, users should specify clearly the materials or subject-matter characteristics desired and the geographic or geo-administrative areas for which the census data are required. In some cases, the general nature of the problem, hypothesis, or project might assist in determination of their availability.

The major products and services available through the User Inquiry Service are outlined in the following sections.

#### Agriculture

Users solely concerned with Census of Agriculture data or methodology may wish to contact directly

Census of Agriculture, Statistics Canada, Ottawa K1A 0T7 Telephone (613) 994-9855

#### Computer Print-outs and Microfilm

In addition to the tabular results released in the form of reports or bulletins, a large number of tables were produced in the form of computer print-outs. These tabulations were microfilmed and their contents can be made available as photocopies or on microfilm, subject to confidentiality constraints. Data in these formats are individually prepared on request and a charge to cover the cost of reproduction is made.

Microfilm of the foregoing tabulations are on 16-millimeter diazo film and are supplied in conventional 100-foot rolls (1,500-2,500 images). Silver copies are available on a special order basis.

In most cases, more than one tabulation will be found on an individual roll of microfilm. However, only complete rolls are supplied. Cartridges and cartridge loading are the customer's own responsibility. More information can be obtained by contacting the Census User Inquiry Service.

### Maps and Geographic Reference Materials

Large scale maps depicting the boundaries of the 1971 Census enumeration areas and other statistical areas can be purchased. These include an urban map series, a rural map series and a census tract map series showing enumeration areas (i.e. the territory covered by each enumerator in taking the census). In addition, various small scale maps are available depicting census divisions and other statistical areas. Maps from the 1971 Census are also available on 35-millimeter microfilm. A detailed list of the reference maps indicating scales, dimensions and costs can be obtained by requesting "Availability of Reference Maps 1971, Census Field". (G-71).

Official Lists, identifying the composition of administrative and statistical areas (i.e. counties, cities, towns, villages, municipalities, census tracts, metropolitan areas and census agglomerations) in terms of the component enumeration areas and census codes, are available at nominal cost.

Street Indexes providing the link between civic addresses and enumeration areas (and census tracts where they exist) were compiled for 59 centres in the year preceding the 1971 Census and are available in published form and on magnetic tape. Indexes for 37 of the largest centres have been updated as of June 1, 1971 and are available at nominal cost in the form of computer printouts and also on computer tape.

#### Magnetic Tape Files

Area Master Files describe the street network and other physical features as defined by means of geographic coordinates within a designated area. Presently there are 16 census metropolitan areas for which this file is available.

Cartlib is a geographic boundary file of Census divisions and Census tracts in a format usable by computer mapping programmes.

The GEOGRAPHY TAPE FILE links the smallest unit of collection, namely Enumeration Areas and corresponding centroids to all higher level geographic codes such as Federal Electoral Districts, Municipalities, Counties, Cities, Towns, Villages, etc. for all of Canada. This file also provides a linkage between Census and Standard Geographic Codes.

Other general reference materials available include Enumeration Area and Census Tract Descriptions, changes in Municipal Boundaries, Census Tract and Enumeration Area Correspondence Tables.

#### **User Summary Tapes**

A large number of tables were produced and are available on computer tapes. The tape files contain tabulated data and usually have more detail than is provided in printed reports. The summary tapes allow users to aggregate the tabulations either on a geographic basis or by combining data cells. They are available for a variety of geographic areas including enumeration areas (225-500 persons), census tracts (2,000-4,000 persons) and municipalities (Population 5,000 and over).

The tape files are organized to provide Canada-wide coverage for a particular geographic level. Separate tape series have been produced for the short 2A-form (100% coverage) questions, the long 2B-form (1/3 sample) questions, and for the census of agriculture. Additionally for the first time, micro data in the form of public use sample files based on 1% sample of the 1971 Census are also available.

In addition to tapes containing tabulated information from the census questions, several tapes containing supplementary geographic data are available. The most commonly used are the Geography Tape and the Statistical Area Boundary File (CARTLIB). The former contains the complete higher level geographic codes for all enumeration areas (which is the smallest collection unit) and the latter contains a machine-readable base map (geographic boundaries) for computer mapping of census tracts and and census divisions. Other files include area master and street index files.

#### Special Tabulations

Insofar as confidentiality constraints permit, Statistics Canada will produce for users, at cost, special computer tabulations not included in the main programme. In most cases, these special tabulations will be produced using the Geographically Referenced Data Storage and Retrieval System (GRDSR) commonly known as Geocoding. The GRDSR system is designed to provide flexibility in cross-tabulation and specification of the geographical areas (i.e., user defined areas) for which special tabulations are to be produced.

Special tabulations can be produced in hard copy (print-out) form, or on magnetic tape. Cost estimates will be provided upon submission of the tabulation specifications. Users desiring special tabulations are requested to be as precise as possible in describing their requirements. Essential specifications are: the exact variables or characteristics required; the set of responses or categories to be reported for each characteristic; and the specific geographic units for which data are to be tabulated. An illustration of the desired table layout and acceptable alternatives for any of the above will facilitate understanding of the specifications and processing of requests. Turn-around time for such requests will depend upon the complexity of the tables and availability of resources and the demand. Contracts and prepayment or deposits may be required.

#### How to Order

Maps, print-outs, microfilm, computer tapes and special tabulations:

(1) Requests for all materials other than printed reports should be addressed to: User Inquiry Service, Census Field, Statistics Canada, Ottawa K1A 0T7. Please note that Deposit Accounts established with Supply and Services Canada for regular publications CANNOT be used for these materials.

Maps, tabulations and microfilm can be ordered from the indexes available from the User Inquiry Service or by specifying the nature of the data required. Orders for summary tapes should indicate the type of computer, recording density, decimal representation (packed or external) and label requirements, if any. Documentation detailing record length, block size and record layouts is available for all files.

- (2) Prices for special materials (subject to revision) are:
  - photocopies of computer printouts – 20¢ per page
  - microfilm: tabulations –16mm. diazo –\$4.65 per roll

- maps: 35mm. diazo –
   \$5.75 per roll
   (microfilm also available as silver duplicates)
- computer summary tapes –
   \$55 per reel (includes cost of 2,400-foot reel of magnetic tape)
- special tabulation prices are individually estimated and prepayment usually required and contract forms indicating terms of payment will be provided.

Note: Advance payment may be requested.

#### Bibliography of Papers and Reports in the Census Field Internal Series

This bibliography covers works produced in the Census Field in the period 1965 - 1975, and is the seguel to "A Bibliography of Canadian Demography, Technical Paper No. 5 (1966)." The bibliography lists reprints of articles which staff members publish in journals or in official proceedings of conferences; analytical and technical memoranda dealing with technical aspects of census information; working papers and research memoranda, which contain tentative ideas and discussions of a wide range of census subjects; planning and procedural memoranda, which provide a means for the dissemination of information pertaining to census plans and procedures; and results memoranda which provide detailed descriptions of census operations or procedures. Updates to this bibliography will be issued as required. Requests for copies should be forwarded to: Manuals Unit, Census Field, Statistics Canada, Ottawa K1A 0T7.

### GRDSR: Facts by Small Areas, An Introduction

This 21-page brochure describes the GRDSR (Geographically Referenced Data Storage and Retrieval) system as a

method of assembling statistical information by user-specified areas. Copies can be obtained from User Inquiry Service, Census Data Dissemination Division, Census Field, Statistics Canada, Ottawa, telephone 996-5254.

### Geocoding: Guidelines for Requesting Geographical Areas

This 30-page user manual provides detailed instructions to the user on how to outline or describe geographical areas of interest. The request would then be processed through the GRDSR system to extract custom-made census data tabulations. Copies can be obtained from User Inquiry Service, Census Data Dissemination Division, Census Field, Statistics Canada, telephone 996-5254.

#### Consumer Income

Micro data files are available for the years 1971 and 1973 and the intention is to release such files from surveys with larger samples (e.g. 1975, etc.). Inquiries about this material as well as requests for special tabulations should be directed to: Data Dissemination Consumer Income and Expenditure Division, Statistics Canada, Ottawa, Ontario K1A 0T6, or telephone 992-4742, Area Code 613.

#### Education

The Education, Science and Culture Division provides statistics, commentary and analysis in a series of publications ranging from occasionals to annuals, plus a number of special studies.

A Service Bulletin presents tables and text using the most recent data available or preliminary figures, on current topical issues in education.

The Division is developing computerized educational information systems. These systems provide users with the capability to access data files and request

tables not produced by the division. The requests however, necessarily operate under the secrecy requirements of the Statistics Act. At present there are several operational systems:

University Student Information System (USIS);

Community College Student Information System (CCSIS);

Elementary-Secondary Teacher System (ESTS);

University and College Academic Staff System (UCASS), and several others.

Requests for further information should be directed to the Education, Science and Culture Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 995-9690, area code 613.

#### **External Trade**

#### Imports - Tariff Item Summary

Monthly tabulations (imports by tariff item by countries – monthly and cumulative):

\$180 per year \$25 per month (except December) \$60 month of December

Monthly statements – prepared from the monthly tabulations – for specified tariff items:

\$2 per tariff item per month.

Exports – Region of Lading – (commodity group, by region of lading, by region of customs clearance, by country).

Quarterly tabulations: \$140 per year Annual tabulations: \$80

#### Imports, Province of Customs Clearance; and Exports, Province of Lading or Clearance

Monthly tabulations – (commodity by province of customs clearance):

\$12 per annum for the first commodity.

\$4 per annum for each additional commodity.

Quarterly tabulations – (commodity by province of customs clearance, by countries):

\$4 per annum for each commodity.

Annual tabulations – (commodity by province of customs clearance, by countries):

Cost available on request; minimum charge \$30 per printout.

### Imports or Exports – Commodity Division or Group Summary

Monthly tabulations:
2-digit (division) by country
3-digit (group) by country
Cost available on request.

#### **Imports or Exports**

Annual tabulations:

Province by commodity, by country Group of provinces, by commodity, by country Cost available on request.

### Imports or Exports – Standard International Trade Classification

Quarterly tabulations – (commodity by country). Cost available on request.

#### Exports – Domestic Exports to the U.S.

Commodity group by Census Subdivision of consignment in the U.S. by region of lading in Canada:

Quarterly tabulations:

\$100 per annum for first subscription

\$25 per annum for second subscription to same consignee

Annual tabulation:

\$60

### Imports - Concordance Between T.I., M.C.C., S.I.T.C., B.T.N.

A set of four volumes has been prepared for domestic and international use.

The volumes consist of computer print-outs of a concordance from Canada

Tariff Item via the Import Commodity Classification to the Standard International Trade Classification and thence to the Brussels Tariff Nomenclature. In the four volumes each series is presented in turn in numeric order and its relationship to the other three series is shown.

The concordance is updated each year and is available at \$35 per set of two selected volumes or \$70 for a complete set of the four volumes.

### Exports – Convertibility Index Between X.C.C. and S.I.T.C.

A set of two volumes has been prepared for domestic and international use.

The volumes are in X.C.C. order and S.I.T.C. order and they are available at \$15 Can. per set.

#### Imports or Exports - Special Studies

On request, special studies of import and export commodities can be undertaken to provide a finer breakdown of any published commodity class, subject to the availability of appropriate descriptions on customs documents and also to the secrecy provisions of the Statistics Act. Studies are priced on a cost recovery basis in addition to a \$50 per class feasibility study charge.

Following receipt of request, the subscriber will be informed about what information he could expect, how soon a detailed survey could be undertaken and its cost.

Requests for additional information concerning these services should be directed to the Special Information Section, External Trade Division, Statistics Canada, Ottawa, telephone 992-0514 or 992-8896, area code 613.

#### Other Information

Computer tapes with the same information published in regular reports are available to users interested in obtaining

revised time series of selected commodity classes or collating with related economic data. Also available on tape is information tailored to user's specifications, e.g. by mode of transport, region of lading, etc.

#### Microfiche

Commencing January 1975 a new subscription service was made available to users of Trade of Canada data. This constitutes complete copies on microfilm of regularly published reports. Micro-filming facilitates easier access and quicker dissemination of information as well as enormous space savings. For example, the detailed monthly report "Exports by Commodities" (Catalogue 65-004) reproduced on three microfiches can be delivered to users approximately one month before the printed report.

### Reconciliation of United States-Canada Trade Statistics

The United States-Canada Trade Statistics Committee has published two reports containing information on the methods and results of the bilateral research program on the reconciliation of the two country's counterpart trade figures for the years 1970-1972. These reports were published jointly by the U.S. Department of Commerce, Bureau of the Census, Washington, D.C., and Statistics Canada. Copies can be obtained from the External Trade Division, Statistics Canada.

#### Family Expenditure

Some unpublished tabulations, from the 1969 family expenditure survey is available, a list of which will be supplied on request. Unpublished tabulations are also available from some of the earlier surveys. Inquiries should be directed to the Family Expenditure Section, Consumer Income and Expenditure Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

#### Financial Flow Accounts

For the convenience of users, a complete set of historical series, printed in loose-leaf binder form and covering the period I Q 1962 to IV Q 1973 is available upon request. Included are annual matrices, quarterly time series for all sectors and sub-sectors and time series for all major categories. These data reflect all revisions and conceptual changes in the Financial Flow Accounts up to 2 Q 1974. All inquiries should be directed to: Financial Flows Section, 21st floor R.H. Coats Building, Statistics Canada, Ottawa K1P 0Z8.

Complete historical series are also available on CANSIM from I Q 1962 to date. Data for the current quarter are placed on CANSIM at approximately the same time as the "Second Advance Release of the Financial Flow Accounts", about one month prior to the release of the main publication.

#### Highly Qualified Manpower Survey

In 1973 there was a survey of university graduates in Canada, based on replies to the 1971 Census. Ninety tables are available, providing information on the education, occupation, sex, mother tongue, place of birth, industry, residence, income and marital status of 630,600 university graduates. The tables are available, on microfilm, through the Census Data Dissemination Division.

#### Household Facilities and Equipment

Following is a list of unpublished data which can be obtained upon request:

Households with T.V. sets, showing number with telephones and radios.

#### A. Canada, by Province

 Households with radios, showing number with telephones and T.V. sets.

- B. Canada, by Urban-rural Categories –
  Percentage of Households Having
  Certain Facilities and Equipment.
  - 1. Principal heating equipment and fuel; fuel used for piped hot water supply.
  - 2. Water supply and plumbing facilities.
  - 3. Household appliances (cooking equipment, electric refrigerators, home freezers, electric washing machines, electric clothes dryers).
  - 4. Telephones, radios, T.V. sets (total, black and white and colour) and record-playing equipment.
  - 5. Automobiles and automobile radios.
  - 6. Miscellaneous household equipment (1974 air conditioners, automatic dishwashers, outboard motors, electric floor polishers, snow blowers, lawn mowers, overnight camping equipment, boats, and vacation homes).
- C. Metropolitan Areas with 50,000 or More Households – Percentage of Households Having Certain Facilities and Equipment.
  - 1. Principal heating equipment and fuel; fuel used for piped hot water supply.
  - 2. Household appliances (cooking equipment, electric refrigerators, home freezers, electric washing machines, electric clothes dryers).
  - 3. Telephones, radios, T.V. sets (total, black and white and colour) and record-playing equipment.
  - 4. Automobiles and automobile radios.
  - 5. Miscellaneous household equipment (1974 air conditioners, automatic dishwashers, outboard motors, electric floor polishers, snow blowers, lawn mowers, overnight camping equipment, boats, and vacation homes).

#### D. Technical Papers

- Historical revisions based on 1971 Census data are available for the years 1967-1971.
- 2. For 1974 a report presenting sampling error estimates is available on request.

A micro data file is available for 1972 containing household facilities information and household income data obtained by linkage from Survey of Consumer Finances.

Requests for this information should be sent to Data Dissemination, Consumer Income and Expenditure Division, Statistics Canada, Ottawa. The telephone number is 992-4742, Area Code 613.

#### **Justice Statistics**

Much more data and information is available within the Justice Statistics Division than is published.

The particular areas in which detailed information is readily available for research and analysis by interested persons and organizations are: divorce, homicide, the murder of police and custodial officers, the use of firearms in the commission of murder, court statistics and bail reform survey statistics.

Inquiries are invited and they should be directed to the Research Section, Justice Statistics Division, Statistics Canada, R.H. Coats Building, Tunney's Pasture, Ottawa, Canada; telephone 995-0855, Area Code 613.

#### **Input-Output Tables**

Input-Output tables for the years 1961-66 have been completed and published at two levels of aggregation, small and medium. Work is underway on the compilation of annual tables for the years 1967 to 1971. A feature of the Input-Output tables for the 1970's will be a greatly expanded number of commodities (more than 1,700); the number of indus-

tries will accord, in most cases, with the 4-digit level in the 1970 Standard Industrial Classification (S.I.C.). For historical continuity, a concordance has been prepared between the input-output commodity classification and the principal commodity classification as well as between the Input-Output industry classification, the 1960 S.I.C. and the 1970 S.I.C.

There is also work underway to prepare constant price Input-Output tables. Analysis of constant price equivalents may necessitate some revisions in the current price commodity balances. Such revisions to the 1961-66 data will be released with the Input-Output tables for 1967-71. It is planned to have the current price tables for the years 1967-71 completed by mid-1976, with the constant price results to follow by the end of the year.

Inquiries should be directed to the Input-Output Division, Statistics Canada, Ottawa, telephone 995-0631, area code 613.

#### Labour

Unpublished employment data by county (Census Division) are available from special tabulations. Enquiries in this regard should be directed to the Monthly Employment, Payrolls and Labour Income Section, Labour Division, Statistics Canada.

#### **Labour Force Statistics**

Monthly estimates of the population, labour force, employed, unemployed, not in the labour force, unemployment rates and participation rates are given, including numerous cross-classifications by age, sex, region and province, agricultural and non-agricultural industries, occupation, hours worked, number of months looking for work, and reason for absence from work. Sub-provincial data are also provided.

In addition the results of the monthly labour force survey and some of the associated special surveys carried out in conjunction with it are available in micro data form for the reference period July, 1973 onwards.

Detailed information may be found in *The Labour Force* (Catalogue No. 71-001). Enquiries should be directed to the Data Dissemination Unit, Labour Force Survey Division, Statistics Canada, Ottawa, Ontario. The telephone number is 992-4563, Area Code 613.

#### Manufacturing

Principal statistics of the manufacturing industries are available on user-supplied computer tapes as follows:

- (a) Canada and provinces by twenty industry groups, 1949-1961 based on the 1948 Standard Industrial Classification for 1949-1960, on the 1960 revision of the S.I.C. for 1957-1961.
- (b) Canada and provinces by industry group and industry for 1961-1971, based on the 1960 revision of the S.I.C. as modified in the 1969 Census of manufactures. (Certain of the Canada-level data are also available from CANSIM.)
- (c) Canada and provinces by industry group and industry for 1970 to latest available, based on the 1970 revision of the S.I.C.

For information and current prices, contact Regional and General Analysis and Development Section, Manufacturing and Primary Industries Division, Statistics Canada, Tunney's Pasture, Ottawa, K1A 0T6; telephone 996-4991.

There are some tabulations available for 1961 and 1966 data making them comparable with the 1971 definitions of the Census Metropolitan Areas and Economic Regions. For information, contact Regional and General Analysis and Development Section, Manufacturing and Primary Industries-Division, Statistics Canada, Tunney's Pasture, Ottawa K1A 0T6.

#### Merchandising and Services

In addition to its regular publication program, the Merchandising and Services Division undertakes and produces a number of special tabulations.

The resulting data may be published in the Statistics Canada Daily or Infomat, as in the case of a semi-annual report on hotel receipts (based on a panel of large hotels with 50 or more rooms), or included in the Merchandising and Services "Bulletin", which is published at irregular intervals throughout the year. Other articles of interest appear from time to time in the Canada Year Book, or the Canadian Statistical Review.

Requests for further information on these special studies and other related projects should be sent to the Director, Merchandising and Services Division, Statistics Canada, Ottawa, Ontario K1A 0T6. The telephone number is 996-9295, Area Code 613.

### National Income and Expenditure Accounts

The Gross National Product Division produces a computer printout on a quarterly basis of the National Income and Expenditure Accounts, commonly referred to as the GNP Tables. These printouts are available, together with an analysis of the quarter from the Division at a nominal cost of \$5.00 each quarter. Users of the CANSIM Interactive System can also retrieve the tabular material by using the Command "GNP".

#### **Prices**

Five new reports have been added to the catalogue listing, viz., Consumer Prices and Price Indexes (62-010); Industry Price Indexes (62-011); Construction Price Statistics, Quarterly Report (62-008); Construction Price Statistics, Monthly Bulletin (62-007); and Consumer Price Indexes for Regional Cities (62-009).

The first three publications replace the now discontinued Prices and Price Indexes (62-002), and permit publication of a comprehensive set of price statistics. In addition to providing construction price statistics on a regular basis, the fourth publication introduces new series and replaces Service Bulletin 62-006. The third publication provides users with a set of consumer price indexes for regional cities on a regular basis.

In addition to the published price statistics, a variety of unpublished statistics are available on request. To supplement the information contained in published reference documents some technical statements are available. These statements include guidelines respecting the various uses of price statistics, e.g., the use of price statistics in escalation contracts.

If additional work is required to make available unpublished information a fee will be charged. Requests for additional information about the foregoing unpublished material should be directed to the Prices Division, Statistics Canada, Tunney's Pasture, Ottawa, telephone 994-9052, Area Code 613.

#### Standards

#### **Economic Classifications**

Draft Standard Classification of Services. A handbook for classifying intangible economic goods on the basis of the nature of the goods. The classification has roughly 600 items in seven sections. Indexed, English only, August, 1973, Bulletin #5.

### Goods and Services (Commodities) Classifications

Standard Commodity Classification computer list equivalents of the companion Volume II, Classified Index and Volume III Alphabetical Index. These lists of approximately 50,000 items provide supporting detail to Volume I, The Classification, catalogue 12-502. Lists are available in English only.

Principal Commodity Groups is a purposeful list of 1539 homogeneous goods categories based upon industry of origin. It is primarily designed for supply and disposition analysis of materials used, manufactured goods and goods imported into Canada. English only. French equivalent in preparation.

Principal Commodity Groups by industry of origin (as noted above) cross-indexed to the following structures: Standard Commodity Classification (Catalogue 12-502); Industrial Commodity Classification (Catalogue 12-541); Trade of Canada Commodity Classification (Catalogue 12-520E). The cross-indices to the exports and imports classifications are under revision. English only.

Classification of (1) Automatic Data Processing Hardware and (2) Computer Services. These two classifications have been developed to provide a common framework for compilation and analysis of data. The latter classification will be introduced in a survey of computer services. Bulletin No. 14. November 1975, Bilingual.

### Standard Industrial Classification Technical Papers

Information Bulletin No. 1 – January 1972, and Information Bulletin No. 2 – July 1972. These list corrections and changes plus rulings on new index items.

List of S.I.C. Sub-classes – 2nd Edition – March 1975 Eng. and Fr. This lists all of the sub-class codes used by different divisions of the bureau. It also provides a link to publication catalogue numbers.

Canadian and United States S.I.C. Convertibility Index. This is a comprehensive list of U.S. four-digit classes which match, or partly match, with Canadian three-digit classes.

#### Occupational Classification Manuals

Occupational Classification Manual, Comparison Tables 1971 to 1961. These tables enable researchers to aggregate detailed 1971 occupational statistics so that they become generally comparable with 1961 data classified at the broad "Division" level. French introduction only.

Classification Discrepancies Between the 1971 OCM and CCMO. These tables indicate occupations that have been classified differently in Statistics Canada's Occupational Classification Manual (OCM) and the Department of Manpower and Immigration's Canadian Classification and Dictionary of Occupations (CCDO). Such a listing is of use:

- (a) to assist researchers wishing to relate statistics gathered according to the OCM and CCDO classification systems;
- (b) to assist in the conduct of occupational surveys employing some 7-digit occupational codes (found only in the CCDO) and consequently requiring the use of the CCDO in conjunction with the OCM;
- (c) to assist vocational counsellors and others wishing to relate the definitions and background material found in the CCDO to survey data gathered on the OCM base, and;
- (d) to assist analysts wishing to compare titles, definitions and structural elements of the OCM and CCDO.

French introduction only.

Classification des professions recensement du Canada 1971, bulletin nº 4, liste supplémentaire de termes de langue française. This is list of approximately 800 newly-identified french occupational titles, serving as a supplement to the bilingual edition of the 1971 OCM.

#### Structural Analysis

Structural Economic Models: A User's Guide. This volume describes the various structural economic models that have been made operational and are maintained by the Structural Analysis Division and that are available as analytical tools to both public and private institutions. The User's Guide level of documentation is a fully detailed description of 'what the models are' and by implication of 'what the models can do'. For each model sample results are appended.

At the present time, the User's Guide describes the output-determination or input-output models and the price determination model. Chapters describing the long-term model and the interregional model will be added as soon as they are completed in 1976.

The Structural Analysis Division maintains a distribution list so that revisions to existing documentation and new chapters can be circulated to model users as they become available.

Copies of the User's Guide can be obtained from the Structural Analysis Division, Economic Accounts and Integration Field, Statistics Canada, telephone (613) 995-0635

#### Transportation, Communications

The Aviation Statistics Centre provides statistical services to the Canadian Transport Commission and the Ministry of Transport, including both regular and special studies of a detailed nature. While summaries of general interest are published in the Aviation Statistics Centre Service Bulletin (Catalogue 51-004), some additional material is available within resource, timeliness and confidentiality limitations or at the discretion of the C.T.C. and M.O.T. For

further information, write to the Chief, Aviation Statistics, Transportation and Communications Division, Statistics Canada, Room 1201, Congill Building, 275 Slater Street, Ottawa K1A 0N9.

Statistics are available from the Water Transport Unit on the origin and destination of both international and domestic cargoes loaded and unloaded at all unpublished ports. This information supplements similar statistics for the eight principal Canadian ports published in the Shipping Report, Part IV, Origin and Destination for Selected Ports (Catalogue 54-206). Commodity origin and destination is also available for all unpublished material in similar format to that supplied in Shipping Report, Part V, Origin and Destination for Selected Commodities (Catalogue 54-207). Additional Water Transportation data are released in the Water Transport Service Bulletin and in a 14 page pamphlet entitled The Water Transportation Data Sheet, Advance Statistics, both of which are available from the Water Transport Unit, Transportation and Communications Division, Statistics Canada, Ottawa K1A 0T6.

Other subject-matter areas covered by the Transportation and Communications Division also release special statistical information of general interest in service bulletins on Railway Transport, Road Transport and Communications. Information of more limited interest may often be obtained, within confidentiality limitations, when aggregates are published in the Statistics Canada Daily, by writing to the address given or to the subject-matter unit, Transportation and Communications Division, Statistics Canada, Ottawa K1A 0T6.

# Statistical Publications of Other Federal Government Departments and Agencies

While Statistics Canada, as the national statistical agency, publishes statistics on many subjects, there are a number of statistical publications regularly issued by other government departments and agencies. Listed below is a selection of publications of general interest and which are supplementary sources to Statistics Canada publications on the subject. Priced publications are available from the Publishing Centre, Printing and Publishing, Supply and Services Canada, Ottawa K1A 0S9. Bank of Canada Publications are obtainable direct from the bank. Free publications can be obtained by writing to the Information Division of the Department publishing them.

Additional information as to services and information available by direct inquiry to the individual departments and agencies of the Government of Canada is contained in two publications: (1) Federal Services for Business; and (2) Organization of the Government of Canada. Both of these are obtainable as indicated in paragraph one.

International Classification of Diseases, Adapted, Eighth Revision, Volume I, Tabular List, 671 pages. \$3.25

The International Classification of Diseases, Adapted for use in the United States (ICDA) is an expanded version of the Eighth Revision of the International Classification of Diseases (ICD) published by WHO. It is designed for the classification of morbidity and mortality information for statistical purposes, and for the indexing of hospital records for data storage and retrieval. The ICDA contains a coding and classification system for surgical operations and procedures not found in the ICD.

International Classification of Diseases, Adapted, Eighth Revision, Volume 2, Alphabetical Index. English and French. 685 pages. \$4.50

Volume 2 of the International Classification of Diseases, Adapted for use in the United States (CDA) is the Alphabetical Index to the Tabular List of Volume I. It is, however, an essential adjunct to the Tabular List, since it contains a great number of diagnostic terms which do not appear in Volume 1.

The English editions of above two publications can be purchased from the Superintendant of Documents, U.S. Government Printing Office, Washington, D.C., 20402. The French-language editions (Cat. 82-527F and 82-528F) are published by Statistics Canada.

Opportunity for Choice: A Goal for Women in Canada. English and French. \$3.75 a copy. Catalogue 1C23-15/1976.

This book, produced on behalf of Statistics Canada by the C.D. Howe Research Institute, had its origins during International Women's Year as a continuing contribution to the role of women in Canadian Society. It is designed to broaden understanding of the role of women both for the general reader concerned with the place of women in society and for professionals in the disciplines of demography, economics, law, sociology and statistics.

The book contains a presentation of Statistics Canada data on women's participation in the family, educational institutions and the labour force and a comprehensive analysis and evaluation of the evidence. It contains an examination of the effectiveness of existing policies and proposes new ones relevant to the role of women. As the title indicates, a theme of the book is the extent to which women, and men, have opportunities to make choices concerning their roles.

Available from Printing and Publishing, Supply and Services Canada, Ottawa K1A 0S9.

# Title, Subject and Commodity Index

This combined Title, Subject and Commodity Index has been designed to help users locate the required publications. It contains numerous cross-references. Numerical references are to catalogue numbers of the publications for which further descriptive information is provided in the main part of this catalogue. All main words in titles are capitalized.

While this index contains several thousand references to subject and commodity data, not all subjects and commodities covered in Statistics Canada publications are listed. Excluded are the commodities covered in export and import statistics, which are adequately indexed in the Trade of Canada Commodity Classification (12-520E).

Again, the publication "Products Shipped by Canadian Manufacturers" (Catalogue 31-211) contains a detailed alphabetical list of commodities manufactured in Canada, showing value and amount of production for the year covered. No reference is made to the publication in the index, except where the production statistics are not shown in any other publication. However, users may assume that manufactured commodities entered as appearing in other reports also appear in Catalogue 31-211.

In the case of other omissions, the entries for related items often afford a clue to where information, if available, may be found. Lastly, the coverage is increasing and those who cannot locate what they seek should send an inquiry to the Central Inquiries Service, User Advisory Services Division.
